PROJECTS

PsychedTogeteher

- Built a full-stack web platform for Psychology students to discuss and collaborate, featuring user accounts, posts, comments and more.
- The tech stack HTML, CSS, React, PHP, MySQL, and deployed on Hostinger.

VisualStackPro

- VSP is a multi-media viewing app built on electron that lets you view multiple files and videos at the same time, you can import them from the web with just a link or from your own files.
- The tech stack used is HTML, CSS, JS, NodeJS, Electron, Stripe.

Wedding Website

- I made a website for my wedding using HTML, CSS, JS, and PHP.
- It is hosted on Hostinger, and using PHP to connect to their built in SQL database to take in RSVP submissions.

Casino Craps

- Developed a casino craps game in multiple languages as part of my Comparison of Programming Languages class.
- The languages include C++, Fortran II, and COBOL.

ACTIVITIES

Assosiative Computing Machinery Treasurer

University of Tennessee at Martin | Aug 2024 – May 2025

- Helped coordinate club meetings, and take care of finances.
- Hosted coding competitions and meetups with fellow students.
